experience

ellevest, software engineer i

february 2021 - present

- improving fraud flows and minimizing CX tickets by building integrations with third parties like Inscribe, Sift, and Plaid as part of the financial operations team

- wrote scripts for the largest backfill in company history, converting 50 million+ transactions into a more efficient model, then designed and built new web pages for financial advisors to moderate these transactions

- leading efforts to improve sitewide accessibility and companywide documentation

buzzfeed, software engineering intern

summer 2019

- built and launched front-end for a new internal tool to help editorial staff change BuzzFeed's navigation bar and direct 40 million+ monthly users towards trending topics

- organized and lead efforts to reach 200+ NYC interns for BuzzFeed events and a Women in Tech Q+A for Girls Who Code Students

girls who code, teaching assistant

summers 2017 and 2018

- empowered 40 high school girls through computer science education for Girls Who Code's Summer Immersion Program
